

WOOD GOLF CLUB HEAD

ABSTRACT OF THE DISCLOSURE

A golf club head includes a housing and a reinforced elastic supporting member. The housing has a front portion on which a face is disposed, a sole portion, a rear portion, a crown portion, a toe portion, a heel portion, a neck, and a chamber inside. The reinforced elastic supporting member has an end bonded to the sole portion or the rear portion of the housing, the other end bonded to the front portion or the crown portion of the housing, and a middle portion suspended in the chamber of the housing.
